» **Product-minded engineer.** I love working in a team environment and solving hard (and often vague) problems! Strong believer in servant leadership.

Experience

Stripe — Staff Engineer

Jan 2020 - Present

- Full-stack engineer on [Stripe Connect](#), focusing on funds flows and enabling money movement use cases for marketplaces and SaaS platforms worldwide. - Currently leading a project to greatly improve [Separate Charges and Transfers](#), aligning teams across three separate orgs for product planning and technical execution. Led technical strategy and all API design aspects. - Key contributor to large projects like [Unified Accounts](#), [Embedded Components](#), [V2 Accounts](#) architecture, platform monetization with [Instant Payouts](#), and critical incidents like SVB. - Previously contributed to teams building initial versions of [stripe.com/card](#) (interim manager, 6 months) and [stripe.com/treasury](#).

Off Their Plate — Tech Lead (Volunteer)

Mar 2020 - Feb 2023 (primarily nights and weekends) - Led the **Tech Team** at a volunteer-led nonprofit that provides meals to food-insecure communities by partnering with restaurants. - Built automation tools to streamline operations, including automatic scheduling, email processing, feedback surveys, photo ingestion, and ledgering. - Reduced manual effort for city operations teams, enabling greater focus on restaurant and healthcare partnerships. - Continued involvement beyond the COVID-19 emergency to address ongoing food insecurity and restaurant industry challenges.

HyperScience — Director of Engineering

Dec 2015 - Dec 2019 - Built the original sales demo that became HyperScience™'s flagship product, driving growth from \$0 to \$20M ARR. - Led 4 teams totaling 22 engineers developing a product deployed at 20+ enterprises, generating \$20M+ ARR. - Scaled the engineering org from 10 to 45, leading hiring, project management, and people processes. - Developed the engineering career ladder, deployment strategy, on-call support, and documentation.

Tumblr — Engineer / Team Lead (Core PHP & Media)

Jul 2014 - Nov 2015

- Optimized application code and modernized the infrastructure of Tumblr™'s monolithic PHP app. - Managed storage and serving pipelines for user-generated media (image, video, audio). - Co-authored Tumblr™'s on-demand image resizer service (C/nginx, AWS) and later developed a GIF-specific version.

Bloomberg — Financial Software Developer

Jun 2011 - Jun 2014

- Managed the Fixed Income ticketing platform across multiple asset classes. - Led a project to bring algorithmic trading to the retail fixed income market in Bloomberg.

Education

University of Virginia

B.S. Computer Science — Graduated with Highest Distinction (CS GPA: 3.98)
