 **Product-minded engineer.** I love working in a team environment and solving hard (and often vague) problems! Strong believer in servant leadership.

Experience

OpenAI — *Member of Technical Staff*

Jul 2025 - Present

- Shipped [AgentKit](#) and [Workspace Agents](#).

Stripe — *Staff Engineer*

Jan 2020 - May 2025

- Worked as a full-stack engineer on [Stripe Connect](#), focusing on funds flows and enabling money movement use cases for marketplaces and SaaS platforms worldwide.
- Led [funds segregation for Separate Charges and Transfers](#), aligning teams across three orgs on product planning and technical execution; owned technical strategy and API design.
- Contributed to large projects including [Unified Accounts](#), [Embedded Components](#), [V2 Accounts](#) architecture, platform monetization with [Instant Payouts](#), and critical incidents including SVB.
- Contributed to teams building the initial versions of [stripe.com/card](#) (interim manager, 6 months) and [stripe.com/treasury](#).

HyperScience — *Director of Engineering*

Dec 2015 - Dec 2019

- Built the original sales demo that became HyperScience's flagship product, driving growth from \$0 to \$20M ARR.
- Led 4 teams totaling 22 engineers developing a product deployed at 20+ enterprises, generating \$20M+ ARR.
- Scaled the engineering org from 10 to 45, leading hiring, project management, and people processes.
- Developed the engineering career ladder, deployment strategy, on-call support, and documentation.

Off Their Plate — Tech Lead (Volunteer)

Mar 2020 - Feb 2023 (primarily nights and weekends)

- Led the **Tech Team** at a volunteer-led nonprofit that provides meals to food-insecure communities by partnering with restaurants.
- Built automation tools to streamline operations, including automatic scheduling, email processing, feedback surveys, photo ingestion, and ledgering.
- Reduced manual effort for city operations teams, enabling greater focus on restaurant and healthcare partnerships.
- Continued involvement beyond the COVID-19 emergency to address ongoing food insecurity and restaurant industry challenges.

Tumblr — Engineer / Team Lead (Core PHP & Media)

Jul 2014 - Nov 2015

- Optimized application code and modernized the infrastructure of Tumblr's monolithic PHP app.
- Managed storage and serving pipelines for user-generated media (image, video, audio).
- Co-authored Tumblr's on-demand image resizer service (C/nginx, AWS) and later developed a GIF-specific version.

Bloomberg — Financial Software Developer

Jun 2011 - Jun 2014

- Managed the Fixed Income ticketing platform across multiple asset classes.
- Led a project to bring algorithmic trading to the retail fixed income market in Bloomberg.

Education

🎓 **University of Virginia**

B.S. Computer Science — Graduated with Highest Distinction (CS GPA: 3.98)

Technical Experience

- **Languages & Frameworks:** Python, Ruby, Django, Typescript/JavaScript, React, C++
- **General:** Project management, Working knowledge of ML concepts, People management (not currently preferred)

Personal Life

- 🎸 Professional musician and DJ ([Spotify](#))
- 🧗 Sports/outdoors Enthusiast: Passionate about rock climbing, snowboarding, and ultimate frisbee.
